ABOUT US

Williams Shipping have been supporting the marine industries since 1894. Today, we are the authorised distributor for several major marine lubricant companies. With depots in Southampton, Pembroke and Aberdeen, we can deliver anywhere in the UK and Ireland and many locations in northern Europe.

We also provide a range of other marine services and vessel charter as well as road haulage and cargo handling services.

Find out more about us at williams-shipping.co.uk.

About the banded pallet range

Williams Shipping supplies a comprehensive range of spill trays, pallets and flooring, which are all manufactured in a UK facility. Our containment products are all designed to help achieve legal compliance in relation to the correct storage of liquids and improve housekeeping, which often has a positive impact on health & safety.

The sumps of the containment products are fully compliant with all the current regulations pertaining to the storage of liquids, namely the rule that states that the sump must be able to accommodate 110% of the single largest item or 25% of the aggregate stored, whichever is the greater.

The products have been designed with practicality and ease of use in mind. 4-way entry spill pallets provide access from any side without having to push and pull them around to find a side that will accommodate the forks. The polyethylene construction offers a more cost-effective, lighter weight alternative to steel, with a broader range of chemical compatibility.

DRUM SPILL PALLETS

Our drum spill pallets are manufactured in the UK and comply with all current UK regulations relating to sump capabilities. Available in different configurations with options including 4-way access for easy handling, low profile for easy loading, and covered versions for outdoor storage. These drum spill pallets come complete with removable decks so they can be used with palletised or loose drums.

BP2FW
